

SCRAPING & DATA

Daniel Lim

Daniel gets data out of places that don't make it easy. Daniel writes Python crawlers and extraction pipelines that handle dynamic pages and rate limits, run on a schedule and deliver clean, structured output.

OWNS

Web scraping & data pipelines

Reliable, scheduled data collection that turns messy sources into clean datasets you can use.

Large-scale crawlers for dynamic sites · Scheduled extraction & monitoring · Clean exports to CSV, JSON, SQL or APIs

ROLE IN OUR PROCESS

01

Build in short cycles

SPECIALISTS

The right specialists build in weekly increments. You get regular demos and progress you can try yourself.

02

Launch & handover

WHOLE TEAM

We deploy, document and hand over the source code, then stay available for support and future work.

PROJECT EXPERIENCE (3)

Swim Rankd

WEB PLATFORM

A gamified performance platform for competitive swimmers, parents and coaches. Race results turn into personal bests, rankings, badges and a fantasy league the whole family can play.

- Automatic PB detection per event and course, with time-standard bonuses (BB to AAAA)
- 21-tier level system and leaderboards filtered by age, gender and club
- Fantasy teams scored live from real meet results
- Separate experiences for swimmers, parents and admins

LindenTree Advisory

BRAND WEBSITE · UNITED STATES

The website for a hospitality advisory firm that guides hotel openings, brand strategy and asset management. Its current hotel projects set the tone from the first screen, with a quiet, editorial feel that suits a luxury audience.

- Full-screen, cinematic slideshow of client properties
- Client, founder, careers and process sections
- Light and dark themes
- Responsive layout tuned for phones and large screens

Gaming Eminence

MARKET INTELLIGENCE

Market intelligence for B2B suppliers selling into regulated gambling markets. Suppliers see which operators hold which licences, which brands they run and who already supplies them, with a source behind every claim.

- Operators, brands, licences and regulators mapped across 62 regulated markets
- Gold, Silver and Bronze evidence tiers, from regulator registers to company websites
- Qualification scores that match operators against a supplier's own criteria
- Every claim linked to its source, evidence tier and verification status
